

Operation – Secure Interface

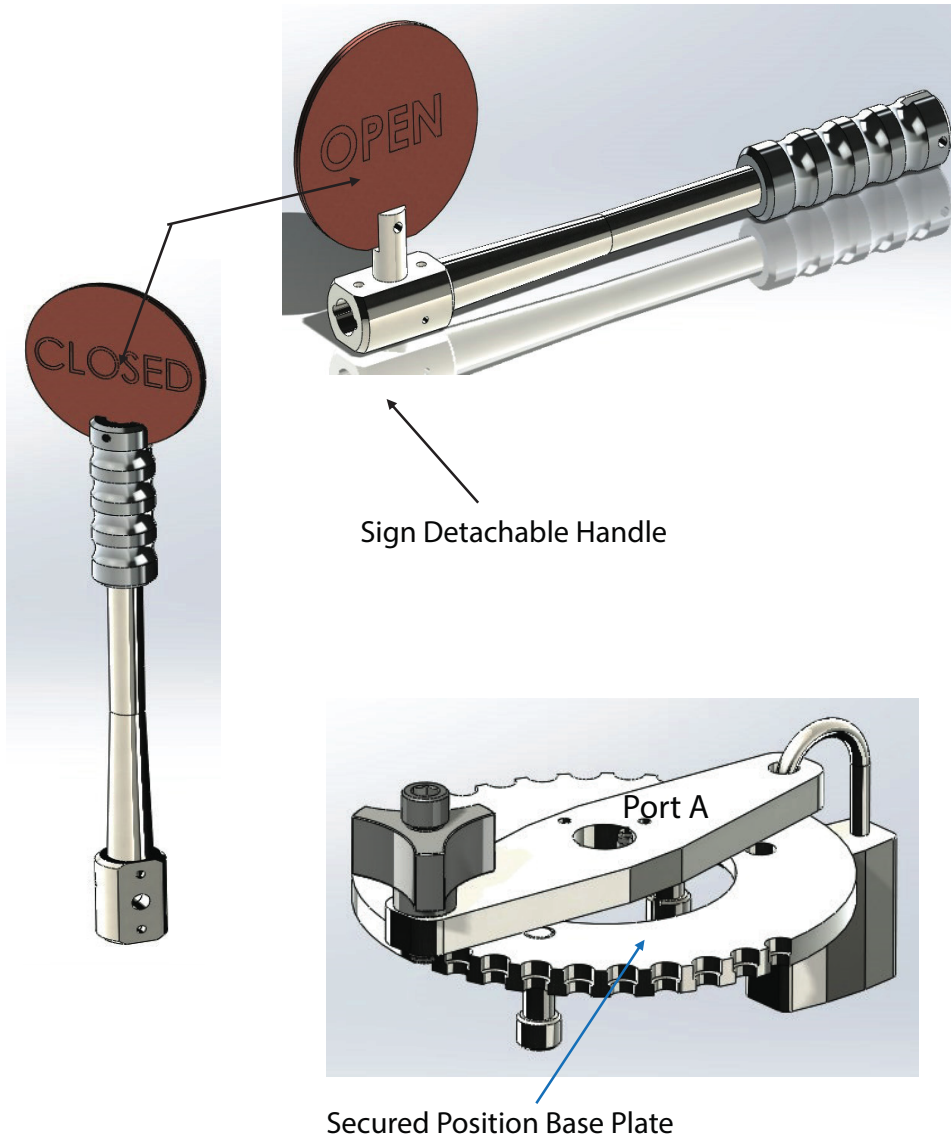

DESIGN FEATURES 1-7

- **Smart Handle Option** - Includes a position base plate, detachable handle and OPEN/CLOSE signs.

- **Sign Handle** - Attach the handle horizontally for valve operation and attach vertically if it is used to display the sign and store the handle.

Consult with PDC for other actuation options, including ACTUATORS customized to your application.

- **Position Base Plate** - Position plate has a pair of 10-position step slots. Each step slot has a small slot lock the position, and the large slot is for cap screw position. The top bar is secured by two screws from the bottom and coupled to the shaft by two spring pins. Each of the 10 positions can be secured by two cap screws or one cap screw and a lock for high vibration applications or to secure the valve from tampering.
