

Accessories: PDC Universal Brackets & Linkages

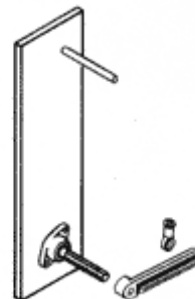

PDC offers a selection of "Universal" brackets and linkage with which any of the electric or pneumatic actuators in use today can be mounted to PDC Valves. The "Universal" features of design incorporated in our brackets and linkage, combined with a versatile selection of shaft end configurations, insure simple, precise, and economical mounting of actuators to PDC Valves, either at the factory or in the field.

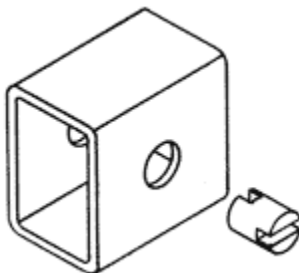

Type 1
 Designed for mounting crank arm type electric actuators.

Type 2
 Designed for nose mounting spring return diaphragm or cylinder style pneumatic actuators.

Type 3
 Designed for pivot mounting damper piston or cylinder style actuators

Type 4
 Designed for mounting direct coupling electric or pneumatic actuators.

Type 5
 Designed for mounting direct coupling actuators to direct fitting PDC shaft.
